

3D LED Flex 40 IP66 Class 2

1, 2, 3 or 4 x high power LEDs with lenses per module

Modular, 3D flexible LED linear lighting system

1, 2, 3 or 4 x high power LEDs with lenses per module

Modular, 3D flexible LED linear lighting system

Product description:

For use in exterior indirect cove lighting or direct wall washing applications where the building surfaces are non linear with curved profiles

Each module - 1, 2, 3 or 4 x Cree XP-E, XP-G LEDs with Ledil Lisa2, Larisa, or Tina2 lenses. See LED / lens matrix for beam angle options

Up to 5 Watts per 4" (100mm) module

30 Volt - 48 Volt DC supply depending on application

Flexible in 3 dimensions - Articulated ball-joint system between modules

LED pitch is maintained between the modules

Side, back and end power feed and connector options allow for continuous lighting with no dark areas between fixtures. 17.5 Amp IP68 connectors join fixtures together on-site

Integral LV constant current driver

Dimming options available: 1-10V, DMX and DALI. Separate dimming channel

Various LED colour temperature and CRI options available

Satin black, satin white or any RAL paint colour finish

Custom lengths based on a 4" (100 mm) module up to 8.3' (2.5 mtrs)

Various mounting options and bracket types are available

Low iron UV block glass covers or UV stable polycarbonate windows

* RGB, RGBW, RGBA and Dynamic-white options do not use a colour mixing lens. For a colour mixing lens version see the data sheet for the 3D LED Flex 40 IP66 with 1 x RGBW LED array with colour-blending lens per module

Up to 1,500 lumens per ft

(Up to 5,000 Lumens per Mtr)

3D LED Flex 40 IP66 Class 2

1, 2, 3 or 4 x high power LEDs with lenses per module

Adjustable angle mounting bracketry

Standard IP66 adjustable angle mounting bracket
Aluminium. Powder coat finish.

Custom height IP66 adjustable angle mounting bracket
Aluminium or stainless steel. Powder coat finish.

Adjustable angle mounting bracketry for 3D LED Flex 40 IP66

The 3D LED Flex 40 system is flexible in 3 dimensions, which allows it to follow curved building contours. Once they have been fixed to the building surface, adjustable angle brackets allow the modules to be rotated around the major axis, so that the light output can be aimed precisely.

The angle of the modules can be adjusted by hand easily on-site. The friction ball-joint system keeps the modules correctly positioned. There is also a lockable option, which allows each module to be locked in place using an Allen key once it is correctly positioned.

A standard height version and a custom height version are available. Custom options are also available.

The standard height bracket is made from aluminium and the custom-height bracket can be made from either aluminium or stainless steel for more demanding exterior applications.

Both options have a powder coat finish which is available in satin black, satin white or any RAL paint colour finish.

The angle of the modules can be adjusted by hand on-site

Product code	IP	Finish	Height of legs
RAD 3D LED FLEX 40 IP66 ADJUSTABLE ANGLE BRACKET STANDARD AL	66	Aluminium: Black White Any RAL colour	Custom height version only: 0.8\" (20mm)

3D LED Flex 40 IP66 Class 2

Anti-glare accessories

3D LED FLEX 40 anti-glare accessories

For use with the 3D LED Flex 40 system IP66 to control light glare from the LEDs when the fixtures are not fully recessed

3 blade, 1 blade and no blade snoots are available

Satin black, satin white or any RAL paint colour finish. Two colour versions are also available - eg. white finish on exterior & black finish on interior of snoot. Both interior and exterior parts can be any RAL colour paint finish, or any anodised finish

Custom height to order

Straight or any custom cut angle side-profile to order

Product Code	No. of blades	IP	Height	Cut angle of side-profile (°)	Finish

3D LED Flex 40 System Class 2

Ball-joint types

Product description:

Radiant's 3D LED Flex 40 system comprises a patented articulated ball-joint system which links the heatsink modules.

The ball-joints system allows the strips to bend and twist in 3 dimensions, so that they can follow any building contours, whilst maintaining a constant LED pitch.

There are various types of ball-joint to suit different applications, some of which can be seen on this data sheet. Please contact Radiant to discuss custom solutions.

Product Code	Material	Length
