

Radiant Architectural Lighting provides innovative lighting for projects around the world.

For more information about any of the products below, or any other solutions from our extensive range, please contact our team who will be happy to help, or arrange a virtual meeting to discuss your project.

Sky Pool, Embassy Gardens, London

Euclid 30 IP68 System
Underwater IP68 LED linear lighting system
6 x high power LEDs with lenses per 0.3mtr module

Sky Pool, Embassy Gardens, London
Lighting design by GIA Equation
Project photos by Ballymore

GIA Equation specified Radiant's Euclid 30 IP68 System to illuminate the 25-metre-long crystal clear Sky Pool which stretches between the rooftops of the Legacy Buildings at Embassy Gardens. An impressive feat of engineering, the Sky Pool is the only one of its kind.

Concealed within the staircase leading into the swimming pool, the Euclid 30 linear submersible lighting system with high power LEDs and elliptical beam lenses provides a light graze effect along the floor of the pool.

The system components are cast in 316 L stainless steel and are suitable for use in saline and chlorine environments, up to 2 mtrs in depth, including pools, fountains and marine projects.

The system can be run at 25 Watts per mtr and provides up to 2,500 Lumens per mtr with white LEDs.
